Photo Etch Hosts SEA CEO Conference *Executives from Top Aerospace and Defense Companies Attending*

FORT WORTH, TX – May 29, 2009 – Randy Fry, CEO of Photo Etch, a leading aerospace manufacturing company, announced that Photo Etch will be hosting the Supplier Excellence Alliance's (SEA) Summer CEO Conference titled, "Recession Proof Your Business" on June 2, 2009. Approximately 50 executives of well-known companies such as Parker Aerospace, Honeywell Aerospace and United Technologies Corporation, as well as other aerospace suppliers are expected to attend.

The all-day conference will include an SEA Board Members "Lessons Learned" panel discussion, as well as a session titled, "Assessing Your Leadership Practices for Strategic Advantage." Photo Etch executives will also be demonstrating how the company has been recession-proofed by:

- + Increasing inventory turns by 100% to free up cash
- + Dramatically improving on-time delivery
- + Eliminating large amounts of WIP
- + Identifying and removing bottlenecks
- + Creating long-term contracts through collaborations

In June 2006, Photo Etch joined SEA and became the first supplier in Texas to engage in the organization's lean enterprise conversion process. Since then, the initiative has achieved significant improvements in key areas, including order entry, engineering, purchasing and material control.

Fry is currently Chairman of The Supplier Excellence Alliance's (SEA) Advisory Council and Treasurer of the Board of Directors for the 2009 term. Fry serves with executives of well-known companies such as Boeing, Lockheed Martin, Northrop Grumman, Rockwell Collins and Honeywell Aerospace.

About Photo Etch

Photo Etch designs and manufactures displays and control panels used for navigation systems, as well as military and commercial airborne and ground communications. The company also manufactures flight simulation and training components. One of Photo Etch's specialties is night vision technology for airborne military operations. Photo Etch's client base includes major defense contractors like Boeing, L-3 Communications and Rockwell Collins, as well as U.S. Department of Defense agencies like the U.S. Air Force and U.S. Navy. Founded in 1960, Photo Etch follows ISO 9001 and SAE AS9100 quality standards, as well as lean manufacturing standards. The firm operates from a 50,000-square-foot facility in Fort Worth, Texas.
